Is this a "Fast & Focused" Search Request? (Circle One) YES NO

A "Fast & Focused" Search is completed in 2-3 hours (maximum). The search must be on a very specific topic and meet certain criteria. The criteria are posted in EIC3600 and on the EIC3600 NPL Web Page at <http://ptoweb/patents/stic/stic-ic3600.htm>.

What is the topic, novelty, motivation, utility, or other specific details defining the desired focus of this search? Please include the concepts, synonyms, keywords, acronyms, definitions, strategies, and anything else that helps to describe the topic. Please attach a copy of the abstract, background, brief summary, pertinent claims and any citations of relevant art you have found.

Christopher B. Hewett

A method for supplying tissues in a shower stall comprising the tissue dispenser in a stall, then expanding the magazine of a tissue dispenser, the placing tissues in the dispenser. Preferably, the magazine expands via pleats like a bellows. The suspending is preferably done by suspending an element such as a line or hook. Preferably there is an elongate handle for attaching the line or hook.

ABSTRACT

5 A dispenser for dispensing healthcare products comprising at least one dispenser section having at least one dispensing orifice and one disposal section having a disposal opening. The disposal section has fully compressed and fully uncompressed positions and is capable of remaining positioned in any position between the fully compressed and uncompressed positions.

FIG. 2B

FIG. 3

FIG. 4

3/5

FIG. 7

34. (New) The tissue dispenser according to claim 33 wherein the fastener comprises an elongated element for suspending the dispenser.

35. (New) The tissue dispenser according to claim 31 wherein the body is of substantially circular cross sectional shape.

36. (New) The tissue dispenser according to claim 31 wherein the body is of substantially square cross sectional shape.

37. (New) A method of providing tissues in a shower stall comprising the steps of:

A) providing a body forming a tissue dispenser having a tissue dispenser section containing tissues to be dispensed and a disposal section for receiving used tissues, the tissue dispenser section being separated from the tissue disposal section by a wall and having a tissue dispensing orifice; the tissue disposal section having a tissue disposing orifice; a portion of the body defining the tissue disposal section being expandable from a collapsed state to enlarge the tissue disposal section;

B) mounting the body at the shower stall above floor level;

C) expanding the tissue disposal section to provide space for used tissues;

D) removing tissues through the tissue dispensing orifice; and

E) inserting used tissues into the tissue disposal section through the tissue disposing orifice.

38. (New) The method according to claim 37 wherein the portion of the body defining the tissue disposal section includes a pleat extending completely around the periphery of the body; step C comprising expanding the pleat.

39. (New) The method according to claim 38 wherein the portion of the body defining the tissue disposal section includes a plurality of the pleats arranged in accordion fashion, each pleat extending completely around the periphery of the body; step C comprising periodically expanding the pleats as the tissue disposal section becomes full of used tissues.

40. (New) The method according to claim 39 wherein the expanding of the tissue disposal section occurs in a vertical direction.

41. (New) The method according to claim 40 wherein step B comprises suspending an upper portion of the body by an elongated element.

42. (New) The method according to claim 37 wherein step B comprises suspending an upper portion of the body by an elongated element.

Tissue dispenser with waste disposal
